(54) REGISTER SYSTEM FOR TRANSLATION DICTIONARY

(57)Abstract:

PURPOSE: To improve the dictionary editing efficiency by consulting a dictionary at each word part in order to acquire the translated word information even when a compound word consisting of plural words is not contained as it is in the dictionary in a state where an extracted key word is identical with the compound word.

CONSTITUTION: A translation pre-editing part (pre-processing part) is provided with a translation dictionary (plural) means 21, a translation dictionary retrieving means 22, a translation dictionary display/editing means 23, and a key word extracting means 24. When an extracted key word is identical with a compound word consisting of plural words, a dictionary is consulted for the entire compound word. If the entire compound word is not registered in the dictionary, the dictionary is consulted for each component word or the compound word and the words or compound words are combined. Thus the translated word information on the extracted key word is obtained. If each word or the compound word is not registered in the dictionary, the relevant spell word information. Thus the translated words are obtained dictionary editing efficiency is improved.
